

Y-cam Shell White

Product Name: Y-cam Shell White

Manufacturer: -

Model Number: YCEXW01

Y-cam Shell White

The Y-cam Shell White is an external housing enabling any of our indoor Y-cam models (Y-cam White, Black or Knight – standard or SD versions) to be mounted outside.

It is built from carefully specified materials to minimise signal attenuation, making sure that your WiFi signal retains its strength, while always protecting your camera from the elements.

The mounting bracket is universal – allowing the camera to be orientated in any desired direction and is semi-cable managed allowing the power and, if necessary, the ethernet/network cable to be routed to the camera.

Universal Outdoor Enclosure for Y-cam Wireless IP Cameras

The Y-cam Shell is an external housing enabling any of our indoor Y-cam models (Y-cam White, Black or Knight – standard or SD versions) to be mounted outside.

It is built from carefully specified materials to minimise signal attenuation, making sure that your WiFi signal retains its strength, while always protecting your camera from the elements.

The mounting bracket is universal – allowing the camera to be orientated in any desired direction and is semi-cable managed allowing the power and, if necessary, the ethernet/network cable to be routed to the camera.
