

Product Name: ZYCOO CooVox U60 IP PBX

Manufacturer: ZYCOO

Model Number: U60

## ZYCOO CooVox U60 IP PBX

The CooVox U60 IP PBX is specially designed for medium and large companies that need to maintain several PSTN lines or that have many analog phones in use.

### ZYCOO CooVox U60 IP PBX Key Features

- No Licensing Fees (only restriction is system capacity)
- Supports 80 Concurrent Calls
- Designed for Legacy deployments with large analog footprint
- Up to 24 Analog Ports(FXO/FXS)
- VGA Port for Ease of Management
- Optional hardware echo cancellation modules
- Full IP PBX features
- Attach external loudspeaker or IPOD device

This new solution closely resembles the U100, except it supports up to 24 analog ports, which is ideal for business with up to 200 extensions, or that requires up to 80 concurrent calls.

Companies can maintain whatever PSTN lines they require while being able to take advantages of advanced IP PBX features all the same, including Automated Attendant, Voicemail, Remote Extensions, Remote Office Connection, Conference Bridging, Call Recording, Call Detail Records (CDR), Automatic Call Distribution (ACD), Unified Messaging (Voicemail to Email), and more. ZYCOO CooVox IP PBX appliances support CooBill, CooPanel and the CTMS value-added software applications...

#### CooBill - Billing Software

CooBill is an add-on software for the CooVox series. CooBill is designed for hotel deployments and multi-tenancy environments. It allows real-time billing information for all extensions to your CooVox system. You can define prepay or post-pay on extensions, defining different rates for each extension if required. CooBill also provides centralised management of billing for all extensions including the ability to lock or unlock extensions.

#### CooPanel - Reception / Operator Software

CooPanel is an add-on software for the CooVox series. CooPanel is a Windows based piece of software that presents real-time view telephony use within an organisation and displays status for extensions and agents. CooPanel supports a host of features including Click-to-Call from phonebook, check current call and call logs, transfer calls directly to destination extension / voicemail or external numbers, and more.

#### Cloud Telephony Management System (CTMS)

The CTMS is a management solution for organisations with multiple geographically dispersed PBX systems. The CTMS is designed to reduce the complexity and resourcing overhead of providing secure management of site based IPPBX infrastructure. It features centralised configuration, backup, log management, firmware upgrades and much more. Nodes connected to CMTS can make calls to other connected nodes at no charge.
