Ouick Start Guide CISCO

Cisco Small Business Pro SPA8800 Phone Adapter with Router

Package Contents

- SPA8800 Analog Telephone Adapter with Router
- Power Adapter
- RJ-45 Ethernet Cable
- RJ-11 Phone Cables (4)
- Quick Start Guide

Before You Begin

The following basic services and equipment are required:

- An Integrated Access Device or modem for broadband access to the Internet
- A computer with Microsoft Windows XP or Windows Vista for system configuration
- An analog phone for administrative use with the Interactive Voice Response (IVR) system
- (Recommended) An Uninterruptible Power Source (UPS), to ensure continuous operation by providing continuous power to devices such as the Integrated Access Device, switch, and router

Connect the Devices

Note If the SPA8800 is pre-configured by your ITSP, then you do not need to change the default voice settings. Refer to the documentation supplied by your service provider for more information.

- STEP 1 Power off your network devices, including your modem and PC.
- **STEP 2** Connect the phones to the SPA8800, by using one or both of the following methods:
 - Connect an RJ-21 connector to the RJ-21 port (A).

Connector Pinouts Circuit	Pin (Ring)	Pin (Tip)
FXS 1	1	26
FXS 2	2	27
FXS 3	3	28
FXS 4	4	29
FXO 1	17	42
FXO 2	18	43

(C).

Connector Pinouts Circuit	Pin (Ring)	Pin (Tip)
FXO 3	19	44
FXO 4	20	45

 If you are connecting individual phone lines, connect one end of an RJ-11 phone cable to the PHONE 1 port (B). Connect the other end of the cable to an analog phone.

• Then connect other analog phones to the remaining PHONE ports

STEP 3 For access to the PSTN (Public Switched Telephone Network), connect RJ-11 cables from the Line 1 to Line 4 FXO ports (D) to the RJ-11 wall outlet for the telephone service.

STEP 4 Connect one end of an Ethernet cable to the Ethernet port (E). Connect the other end of the cable to your cable/DSL modem.

STEP 5 Connect an one end of an Ethernet network cable to the AUX port (F). Connect the other end of the cable to the Ethernet port of your PC.

STEP 6 Connect the included power adapter to the power port (G). Insert the power adapter into an electrical outlet. The power LEDs on the front panel are lit.

STEP 7 Power on your PC. Make sure the Ethernet adapter of the PC is set to obtain an IP address automatically. For more information, refer to Windows Help.

- Note If the SPA8800 is pre-configured by your ITSP, then you do not need to change the default voice settings. Refer to the documentation supplied by your service provider for more information.
- **STEP 1** Start a web browser on your PC. In the Address bar, enter the following address: 192.168.0.1/advanced
- **STEP 2** If the login screen appears, enter the user name and password that were supplied by your ITSP. If your ITSP did not supply a password, you will not see a login screen.
- **STEP 3** When the Router Status screen appears, click the **WAN Setup** tab.

STEP 4 Configure a DHCP. Static IP. or PPPoE connection:

DHCP

- a. Select **DHCP** for the Connection Type.
- b. If you use a cable modem, you may need to configure the MAC Clone Settings. (Contact your Internet Service Provider for more information.) If your service uses a specific PC MAC address, then select **ves** from the Enable MAC Clone Service setting. Then enter the MAC address of the PC in the Cloned MAC Address field.
- c. Click Submit All Changes.

Static IP

- a. Select Static IP for the Connection Type.
- b. In the Static IP Settings section, enter the IP address in the Static IP field, the subnet mask in the **NetMask** field, and the default gateway IP address (router IP address) in the Gateway field.
- c. In the Optional Settings section, enter the DNS server addresses in the Primary DNS and the optional Secondary DNS fields.
- d. Click Submit All Changes.

CISCO

PPPoE (most DSL users)

- a. Select **PPPoE** for the Connection Type.
- b. Enter the user name in the PPPoE Login Name field, and enter the password in the PPPoE Login Password field.
- c. Click Submit All Changes.

Note For more information about configuring your SPA8800, refer to the ATA Administration Guide on the CD.

Interactive Voice Response Menu

In addition to the administration web server, an Interactive Voice Response unit is available to help you to configure and manage your SPA8800. You can use the telephone keypad to select options and to make your entries.

To access the Interactive Voice Response menu:

- **STEP 1** Connect an analog phone to the Phone 1 port of the SPA8800. Only the Phone 1 port can be used to access the IVR.
- **STEP 2** Press the star key four times: ****
- **STEP 3** After the greeting plays, press the keys on the phone keypad to select your options.

Refer to the IVR Actions table for details.

TIPS:

- After you select an option, press the # (pound) key.
- To exit the menu, hang up the telephone.
- After entering a value, such as an IP address, press the # (pound) key to indicate that you have finished your selection. To save the new setting, press 1. To review the new setting, press 2. To re-enter the new setting, press 3. To cancel your entry and return to the main menu, press * (star).

- reboot at this time.

- the IP address.

IVR Action	IVR Menu Option	Choices and Instructions
Enter IVR Menu	* * * *	
Check Internet Connection Type	100	
Set Internet Connection Type	101	DHCP - Press 0.
		Static IP - Press 1.
		PPPoE - Press 2.
Check Internet IP Address	110	
Set Static IP Address	111	Enter IP address by using numbers on the telephone key pad. Use the * (star) key when entering a decimal point.
		Note: This option is available only after you choose Static IP as the Internet Connection Type, through option 101.
Check Network Mask	120	
Set Network Mask	121	To enter the value, press numbers on the telephone key pad. Press * (star) to enter a decimal point.
Check Gateway IP Address	130	
Set Gateway IP Address	131	To enter the IP address, press numbers on the telephone key pad. Press * (star) to enter a decimal point.

78-18973-02

 While entering a value, you can cancel the changes by pressing the * (star) key twice within half a second. Be sure to press the key quickly, or the * will be treated as a decimal point entry.

 If the menu is inactive for more than one minute, the SPA8800 times out. You will need to re-enter the menu by pressing the star key four times: ****. Your settings take effect after you hang up the telephone. The SPA8800 may

• To enter the decimal points in an IP address, press the asterisk key. For example, to enter the IP address 191.168.1.105, perform the following tasks:

Press these keys: 191*168*1*105.

- Press the # (pound) key to indicate that you have finished entering

- Press 1 to save the IP address or press the * (star) key to cancel your entry and return to the main menu.

IVR Action	IVR Menu Option	Choices and Instructions
Check MAC Address	140	
Check Firmware Version	150	
Check Primary DNS Server Setting	160	
Set Primary DNS Server	161	To enter the IP address, press numbers on the telephone key pad. Press * (star) to enter a decimal point.
Check Internet web server port	170	
Set the Mode	201	Router/NAT Mode - Press 0.
		Bridge/Switch Mode - Press 1.
Check local IP address	210	
Enable/Disable WAN access to	7932	Enable - Press 1.
the administration web server		Disable - Press 0.
Factory Reset of Unit WARNING: All non-default settings will be lost. This includes network and service	73738	When prompted, press 1 to confirm, or press * (star) to cancel. After you hear "Option successful," hang up the phone. The SPA8800 reboots.
provider data.		Note: If you are prompted for a password enter the password that was provided by your ITSP. To enter letters, refer to the instructions at the top of the next column.
Manual Reboot	732668	After you hear "Option successful," hang up the phone. The SPA8800 reboots.
User Factory Reset of Unit WARNING: All user-changeable non-default settings will be lost. This may include network and service provider data.	877778	When prompted, press 1 to confirm, or press * (star) to cancel. After you hear "Option successful," hang up the phone. The SPA8800 reboots.

Entering Text

To enter this letter.. A, B, C, a, b, or c D. E. F. d. e. or f G, H, I, g, h, or i J, K, L, j, k, or I M, N, O, m, n, or o P, Q, R, S, o, q, r, or s T, U, V, t, u, or v W, X, Y, Z, w, x, y, or z All Other Characters

For example, to enter the password *phone@321* by keypad, press these keys: 746630321.

Press the # (pound) key to indicate that you have finished entering the password.

To cancel your entry and return to the main menu, press * (star).
